

# PROCESS

*Bulk Salaries Information through a Meticulous Corporate Salaries System*

## SalaryPRO®

An advanced Salary Processing System, Salary PRO® assists banks in automating their corporate customer salary transfers to employees' accounts, whether internally or to external banks, limiting redundant paperwork and human interference. Offering great interface capabilities with multiple channels such as swift or the web, the system allows banks to receive corporate bulk salary data, and then automatically retrieves and validates content in all file formats, detecting variances in received salary data, compared to the historical data on records at the bank. Its commanding workflow engine empowers banks to control full procedures including data collection and entry, approvals, alerts, escalations, deductions and commissions, and eventual salary deposits into employees' valid accounts with the bank.

### FEATURES :

- ▶ Full integration capabilities with the Swift .
- ▶ Receives salaries files in various formats through multiple channels.
- ▶ Validates the salaries transfers files received against replicated messages.
- ▶ Embedded workflow engine providing approval, escalations and alerting capabilities.
- ▶ Provides the capability to add any attachments or comments to the process
- ▶ Integrates with banking systems.
- ▶ High level security features and audit trail.
